*Standard registration MYR 180 (Before 08 April 2019)

Date: 15 April 2019 / 08:15 - 17:00

Venue: Hotel Armada Petaling Java

2019 Malaysia Training Seminar

ESP Efficiency Optimization for PM 2.5 Reduction

Electrostatic Precipitator (ESP) is dust collecting system which is widely used in various industries e.g Utility, Cement and etc. to reduce emission released from the production process. Maintaining or upgrade ESP performance not only create clean air environment and respond to emission regulation, but also enable production smoothly operate without emergency shutdown.

With over 20 years of experiences in emission reduction, Tai & Chyun cordially invite you to join us for an intensive ESP seminar.

Join Us and Gain:

1. ESP concept and performance assessment
2. Hands-on experiences with ESP operation, maintenance and troubleshooting
3. Sharing ESP technologies
4. Practical case studies
5. Maintenance aid tools and ash handling system

The seminar seats are limited,
